

Fritsch

THE FRITSCH COLLECTION

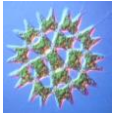

illustrations and taxonomy of Algae -

comprises sheets collating by species several million published figures and taxonomic entries on terrestrial, freshwater and brackish algae from worldwide distributions. Over 3000 genera are indexed within the major algal groups.

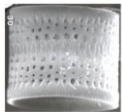

Floristic information from a wide variety of papers, published worldwide from 18th century to the present, is entered "as published". Constantly updated, 'The Fritsch' illustrates and supports the diverse and changing views held on identification and taxonomy.

Entries are supported by a full author citation index, now being upgraded to a searchable bibliography online at www.fritschalgae.info.

A microfiche edition is available, www.idc.nl andt we are working to put it on-line.

**If You Like Algae —
The Fritsch Reference Collection of Algal
Illustrations is the resource for you.**

Curator: *Dr EY Haworth M.Sc., Ph.D.*
